

Post ECB LDCP Survey - Intention to Use the KT Framework (Online Survey)

The purpose of this survey is a follow up with staff with respect to the Knowledge Translation (KT) Framework that was discussed at your last team meeting. Now that the purpose and components of the framework have been described to you, please take a few minutes to respond to the questions below related to how the framework increased your understanding of KT and the likelihood you will engage in more effective KT activities. This information is important to understand the different KT needs of each program and how KT capacity can be expanded beyond this LDCP. Responses are anonymous and confidential. The results of this survey will be summarized and included in the final report for this LDCP in January.

Please indicate your program: (drop down list)

General Awareness of KT

Now that the KT Framework has been explained and is available as a resource, I feel:

Scale: Strongly Disagree, Disagree, Neither Agree Nor Disagree, Agree, Strongly Agree

more aware of what the knowledge translation process entails.

more aware of the importance of knowledge translation activities.

Implementing the Components of KT

Please respond to the following questions taking into consideration the context of the work you do in your program.

Now that the KT Framework is available to guide activities across the health unit: (5 point agreement scale)

Scale: Strongly Disagree, Disagree, Neither Agree Nor Disagree, Agree, Strongly Agree

I have a better understanding of how to effectively synthesize research/evaluation results.

I have a better understanding of how to effectively disseminate research/evaluation results.

I have a better understanding of how to effectively exchange research/evaluation findings with my knowledge users.

I have a better understanding of how to effectively apply and utilize research/evaluation findings in my work.

I am more likely to include actionable messages in my synthesis of research/evaluation results.

I am more likely to include recommendations and implications in my synthesis of research/evaluation results.

I am more likely to tailor my dissemination method to my knowledge stakeholders.

I am more likely to tailor the research/evaluation findings I exchange with my knowledge users/audience.

I am more likely to follow up on any recommendations I make from my research/evaluation results.
